SMART CHOICE

Our products have the best quality/price and design relationship

ECO COOK Concept

Hygienic
High performance
Quickness
Healthy meals

The constant emphasis on differentiated design leads to functional, aesthetically appealing and environmental friendly products. Its high performance ensures quick cooking, significant energy savings, and healthy meals, responding to both consumers and famous chefs needs.

The cookware is manufactured in highly rust-resistant 18/10 stainless steel allowing direct contact with food.

USE

Silampos metal cookware saves you time and energy

- Use medium heat during the first few minutes of food preparations.
- Wait until the liquids begin to boil or until food is golden brown.
- Then reduce the heat to a minimum.
- Remove the piece from the heat source a few minutes before ending the cooking process.

Whatever the heat source used, you won't need to use the maximum setting, saving energy!
The thermal bottom used in all Silampos stainless steel cookware has excellent heat storage properties.

THE FOOD COOKED LOSE MORE OF THEIR JUICES, ALLOWING HEALTHY MEALS.
PREVENTS FOOD FROM GETTING STICK TO THE BOTTOM OF THE PIECE.

IMPACT DISC PLUS TECHNOLOGY

The impact disc plus is the result of the design and development of a versatile thermic bottom, with excellent properties of heat stocking and conduction, durability and corrosion resistance.

MULTIDISC TECHNOLOGY

By using multidisc material it is now possible to spread all the advantages of the Silampos thermal bottom throughout the whole body of the piece. Heating takes place uniformly throughout the piece.

Multidisc cookware does not cool as quickly as traditional cookware. The stainless steel external layers prevent and slow the dissipation of the heat generated by the intermediate layers.
